

Bryan Juarez Hernandez

Newnan, GA | 404-858-4493 | bryanjuarez91286@gmail.com

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in operations support, client service, inventory reporting, vendor coordination, scheduling, estimating support, and technical project work. Interested in entry-level product operations, associate product management, implementation, solutions, business analyst, technical program support, and systems analyst roles. Brings a practical mix of software development fundamentals and front-line operations experience, with a focus on clear communication, organized documentation, and reliable follow-through.

EDUCATION

Kennesaw State University | Bachelor of Science in Computer Science

May 2026

Relevant Coursework: Intro to Software Engineering | Fundamentals of Data Communications | Computer Organization and Architecture | Data Structures | Programming Problem Solving I/II | Operating Systems | Database Systems | Intelligent Systems in Bioinformatics | Modeling and Simulation | User Interface Engineering

PROJECTS

Money Crunch - Mobile Budgeting App Team Project

2026

- Contributed to a mobile budgeting app focused on intentional spending, habit awareness, and financial goals.
- Supported app flows across authentication, multi-step onboarding, bank linking, transaction sync, timeline views, and activity views.
- Worked with Expo, React Native, TypeScript, Appwrite, Plaid, and Mapbox as listed in the project source files.

Stochastic Motorsport Simulator - Course Project

2026

- A Python simulator for CS4632 Modeling and Simulation to model race performance with lap dynamics, stochastic variability, and Montecarlo trials.
- Used JSON-driven configurations, CSV/JSON exports, preset scenarios, and Matplotlib figures to organize simulation inputs and outputs.
- Modeled how vehicle setup, weather, tire strategy, and driver behavior affect lap times and outcomes.

Custom Shopify Storefront - Client Build

2026

- Built a custom Shopify e-commerce storefront with reusable sections and customizable products and collection components.
- Supported a responsive browse-to-checkout flow with polished interaction states and merchandising flexibility.
- Worked with Shopify, React, TypeScript, and Tailwind CSS as listed in the project source files.

EXPERIENCE

South Atlanta Mechanical - Production Support

Summer 2025

Moreland, GA

- Supported precision metal bending and custom fabrication projects for client accounts including Yamaha, Delta Airlines, Southwest Airlines, and Coca-Cola.
- Coordinated inventory control and equipment upkeep to help maintain smooth daily fabrication operations.
- Organized timely delivery of fabricated parts to client sites, communicating across shop-floor and delivery needs.

Plant Partners - Lead Merchandiser Atlanta,

Seasonal

GA

- Coordinated with vendors and staff to schedule and procure products for seasonal retail merchandising needs.
- Assisted with recruiting, onboarding, training, and retention of seasonal merchandisers.
- Maintained product inventory logs and up-to-date filing reports available upon request.

Red Lobster - FOH Team Member Newnan,

August 2021 - May 2023

GA

- Handled cash, card, and check payments accurately while supporting front-of-house workflows.
- Communicated with guests and team members to provide quality service to 40+ guests per shift.

Contractor - Home Restoration Assistant Newnan,

April 2020 - July 2021

GA

- Supported preconstruction planning by gathering quotes, performing take-offs, and helping assemble estimates.
- Communicated with clients on-site and provided service-focused support during residential projects.
- Assisted with preparing practical solutions in a fast-paced project environment.

SKILLS & ASSOCIATIONS

Programming and Technical Foundations: Java, Node.js, JavaScript, Object-Oriented Programming, Algorithm Development, Operating Systems

Development Practices: Git/version control, Software Development Life Cycle, Debugging and Troubleshooting

Business and Operations: Microsoft Office Suite, PowerPoint, Inventory Reporting, Vendor Coordination, Scheduling Coordination, Estimate Support, Take-Offs, Client Communication

Project Tools Listed in Portfolio Source Files: Expo, React Native, TypeScript, Appwrite, Plaid, Mapbox, Python, Matplotlib, Shopify, React, Tailwind CSS
